

Homework 4 - Proposal "Defense"

1. Development of Unikernel Framework for Evaluation of Security

Intellectually Original = 5

Technically Substantial = 4 (see last sentences, might have docked the wrong category)

Socially Constructive = 5

Justification: Alex's topic seems novel and well researched. There is a meaningful need for unikernel security to be investigated and documented considering the lack of contemporary research. The only critique is that the presented timeline exceeds the December 6th deadline. It would be better if the scope were narrowed and the goals changed to what can be contributed now towards the future research Alex has described.

2. PLACEHOLDER

Intellectually Original =

Technically Substantial =

Socially Constructive =

Justification: Alex's topic seems novel and well researched. My main concern, as Leron mentioned, is that the timeline might be too much for Alex to meaningfully contribute something for an end of the semester paper. If the paper were adjusted with the December deadline in mind and the scope narrowed accordingly, while mentioning that the results will aid future research, that would be better.

3. PLACEHOLDER

Intellectually Original =

Technically Substantial =

Socially Constructive =

Justification: Alex's topic seems novel and well researched. My main concern, as Leron mentioned, is that the timeline might be too much for Alex to meaningfully contribute something for an end of the semester paper. If the paper were adjusted with the December deadline in mind and the scope narrowed accordingly, while mentioning that the results will aid future research, that would be better.
